OFFERING COMPREHENSIVE PROTECTION THROUGHOUT THE YEAR, THIS COVER SHIELDS YOUR TABLE FROM THE ELEMENTS AND DAILY DUST ACCUMULATION.

High-Performance Fabric: Constructed from 600D Oxford fabric, known for its strength and durability, ensuring long-lasting use.

UV and Fade-Resistant: Our covers are treated with a UV-resistant coating to safeguard against the sun's harsh rays, ensuring your fireplace continues to look as good as new.

Breathable: The PTFE breathable membrane allows moisture to escape, preventing condensation while maintaining the cover's structural integrity.

Quick-Dry: Incorporates 75D knitting fabric for quick-dry performance, so your cover stays ready and effective, adapting seamlessly to varying weather conditions.

Waterproof and Weather-Resistant: Protect your investment with a fully waterproof cover, designed to keep it dry and in top condition regardless of the weather.

Prevents Water Pooling: Innovative PVC cones support the cover to prevent water pooling, keeping it secure and functional during heavy rain.

Stays Secure: A practical elastic cord at the bottom ensures the cover remains secure and in place, even in strong winds.

Built for Tough Conditions: These covers are made to handle extreme weather-from hot summers to cold winters-ensuring year-round protection.

MATERIALS

Fluid[™] Concrete Technology

BLINDE CONCRETE COFFEE TABLES AND PLANTERS ARE HANDCRAFTED USING ENVIRONMENTALLY FRIENDLY MATERIALS AND FLUID™ CONCRETE TECHNOLOGY. A SOPHISTICATED AND STREAMLINED SYSTEM THAT CREATES EXCEPTIONALLY STRONG. DURABLE AND RELATIVELY LIGHTWEIGHT CONCRETE PRODUCTS, EVERY TIME.

The Concrete

Fluid[™] Concrete Technology uses a custom composition of green cement combined with 95% recycled natural materials.

Our special moulding process incorporates multiple lavers of structural meshing combined with a carefully mixed slurry to produce a highquality and dimensionally stable concrete that is relatively lightweight and incredibly strong.

With a curing process that allows each piece to rest and set in controlled conditions, we are able to produce consistently beautiful products that are built to last.

The Coating

Developed in-house by our research and development team and a highly experienced German coating supplier, Fluid™ products are coated with a water-resistant barrier to ensure the green concrete composite shell becomes totally inert and isn't subject to temperature fluctuations or moisture saturation.

This enables us to deliver perfection from the base raw materials right through to the finished product - working from the inside out, to achieve an exceptionally robust product that is purpose built.

Painted Concrete

Our Painted Concrete finish conceals the raw concrete beneath a uniform colour using a specially formulated solventbased solution that protects the product from environmental weathering. This premium treatment offers:

Colour precision: Each model boasts a carefully curated. uniform colour that ensures a cohesive appearance across the collection, all with a smooth, low-sheen finish.

Flawless uniformity: The painted finish covers raw concrete imperfections for a more refined look.

Graphite

Bone

MATERIALS

Features and Benefits

Eco-friendly Made from a combination of green cement and 95% recycled natural materials that absorb CO2 during the curing process, our composites are 100% recyclable and release minimal greenhouse gas emissions.

Quality Control

Every piece is marked with a unique serial number for quality control and traceability purposes. They're also dimensionally stable with low expansion and contraction rates.

Seamless Construction We generate and work with moulds capable of producing unibody products which are seamless and free from join lines.

Stain Resistant

Rigorous testing confirms the surface is impervious to ethanol, wine, vinegar, oil, mustard, tomato ketchup, salt, soy, bleach, espresso coffee, window cleaner, and more. (Turmeric should be avoided.)

Durable Surface

An exceptionally strong adhesion creates a coating that does not flake, peel or crack, and can withstand extreme weather variations and long UV exposure.

Environment Resistant

Fluid™ concrete is resistant to water, fire, insects, termites, mold and mildew. Fully cured, non-hydraulic concrete does not retain water, meaning it is resistant to freezing and thawing.

Easy Care

Clean with mild soap and warm water using a soft cloth. Apply polymer car wax polish twice a year to nourish and protect, it also adds depth to the finish and brightens surface pigments.

ABOUT US

Get to know MAD Design

MAD Design

MAD Design is a family of globally recognized brands, champions innovative, eco-conscious solutions that elevate the beauty and comfort of all spaces.

Our brands:

Blinde Design furnishes both indoor and outdoor spaces effortlessly and elegantly. Constructed with durable weather-resistant materials and on-trend styles.

EcoSmart Fire delivers limitless fireplace solutions with advanced and diverse fuel technologies to cater to every project's requirement.

HEATSCOPE Heaters revolutionize the outdoor warming experience with sleek silhouettes and an emphasis on discreetly providing comfortable, sunlike warmth.

e-NRG, our bioethanol fuel, leads the market with its superior flame performance and extended burn time.

With MAD Design, you can rest assured that your space embodies the timeless elegance and superior performance it deserves.
